Therefore™ Web Client 34.1

Enhancements

The following enhancements and changes were introduced to the Therefore™ Web Client with the 34.1 upgrade.

- Implemented Auto-Append feature including modes and saving options
- Added responsive floating navigation components to improve file viewing
- Implemented upgrades to graph and number dashboard tiles
 - Graph tiles: Added options to select item type - Documents, Workflows, or Tasks - and parameter selection for workflows
 - Number tiles: Added options to select item type - Documents, Workflows, or Tasks - and additional parameter selection based on item type
- Added operator dropdown to the Advanced Search

Fixes

The following fixes are included in the Therefore™ Web Client upgrade 34.1.

ID	Description
130790	Added input sanitation for embedded PDF file viewing
130994	Fixed an issue which caused dashboard number tiles to redirect to 'Error 404' pages
130937	Fixed an issue causing conditions on numeric tiles to fail
130964	Fixed an issue which caused the 'Open document button' via a shared link to not open the linked document
130935	Ensured that clicking on a number tile redirects correctly for tasks tiles

ID	Description
130527	Fixed an issue causing defaults for email macros to be shown as \$Email:Subject when not yet resolved
130360	Fixed an issue that caused the document title to be incorrect and show all index data fields
130607	Ensured that moving of a document succeeds and does not require to open the document once again
130657	Fixed an issue causing the file size to be shown without unit (KB/MB/GB) in the search result lists
130760	Added a requirement for a search text to extended searches
130984	Fixed an issue causing the manual change category workflow task not to auto-map keyword fields
131163	Fixed an issue duplicating the external authentication methods on the login page
130857	Fixed an issue causing case definitions to be shown with the wrong menu
130601	Fixed an issue causing the table lookup filter to ignore non-text components of an eForm
130333	Ensured that using a dot (.) in the API Property Name (e.g., Q1.2) does not cause incorrect mapping
130871	Adjusted configuration to take tab visibility conditions into account
130673	Fixed an issue causing dropdown menus to be partially hidden in the edge of the window
